# Advantages of the carpanion pool car reservation

Simpler bookings, less effort in the fleet, savings on vehicles, secure storage of keys in key safes

## Poolcar reservation

- Simple booking process for employees (or reception)
- Prioritization of vehicles (electric vehicles) configurable by fleet management
- Booking calendar for fleet management
- Optional: Automatic registration of drivers via single sign-on (MS365)

# Digital logbooks for company cars

## Combination with digital logbook

- Driver recognition and driver registration in the vehicle
- Data protection switch (for private trips)
- Employees only see their own trips
- Automatically receive logbook by e-mail
- Interfaces and cost center allocation

## Integration of key boxes

The Carpanion pool car reservation system offers the option of integrating key boxes.

### Key box for quick and easy installation

- Simple installation of the key box (only electricity required)
- Driver access to booked vehicle keys only
- Open and return with PIN code (or RFID key)
- Modularly expandable to up to 500 keys or several locations per company

Smartbox mit 9 Fächern und Display

Smartbox Erweiterungen für 18 oder 42 Schlüssel

### Possible uses

- Car key
- Room or locker key
- Safe deposit box function
- Documentation of key removals
- Restrict user access
- DSGVO-compliant key storage

## Smart driver's license check

Drivers scan their own driver's license on their smartphone, AI-based verification saves a lot of time

### Artificial intelligence for driver's license checks

- European driving licenses in credit card format are automatically recognized
- Scanning on the smartphone
- Paper driver's licenses are approved online by the fleet manager
